Project 5 - Portal

Link: <https://lamp.cse.fau.edu/~reecem2022/p5/index.html>

For my portal, I decided to format my projects in a 2x2 grid along with GIFS to go with them. There is also a description of what the project is, and the GIFS display a walkthrough of the project.

I decided to use visual studio as my editor of choice, as this is the same editor that I used for the last project. As for the browsers that I've tested this on, all of them displayed my webpage perfectly. These browsers are Microsoft Edge, Firefox, and OperaGX.

I used Bootstrap to format my projects into a pleasing box formation, then I recorded myself browsing through my projects, and used HTML to display them.
